WHO I'M LOOKING FOR
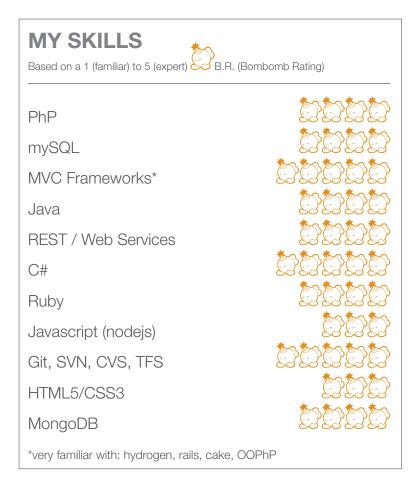

A development team of smart thinkers. To be surrounded by people that care that something not only functions, but functions well. A company and a project that gives me ownership and pride in what I do, and a team that challenges and inspires me to do my best work yet.

MY SKILLS

Based on a 1 (familiar) to 5 (expert) B.R. (Bombomb Rating)

PhP

mySQL

MVC Frameworks*

Java

REST / Web Services

C#

Ruby

Javascript (nodejs)

Git, SVN, CVS, TFS

HTML5/CSS3

MongoDB

*very familiar with: hydrogen, rails, cake, OOPhP

A LITTLE ABOUT ME

I'm a programmer - That is, I love to build, take apart, and re-engineer web applications. I thrive in learning how something works, and how to solve problems. I've developed, designed, and integrated software from multiple sources and made them all work together.

I've been called engineer, programmer, and even "magic make things happen guy".

I'm most happy when I can work in a team of smart and challenging people. I want to build smart, effective applications, using the right tool for the job, not just the tool I know or the flavor of the week.

DROPWALLET
New Jersey
Developer
Since April 2012

I build and maintain ruby / rails applications, and build API endpoints with a 'right tool for the job' attitude including a Ruby / Sinatra API endpoint for our company's limelight CDN source, and Node.JS API router.
I'm rewriting their checkout website to replace what three separate systems do currently, with one unified solution.

THERE'S NO BOX
New Jersey
Co-Founder
Since Aug 2009

With my front-end developer partner, we created a custom CMS focused on small business.
I built the platform in PhP using an MVC design and Open-Source frameworks.

other work as freelance:
Custom Modifications to a C#.NET storefront software, including expanded functionality for custom pricing and discounting.

UNIVERS WORKPLACE
Hammonton,NJ
**Sr. Systems
Integration Specialist**
Aug 2004 - present

I design, develop and maintain the company's mission-critical platforms, and am an active member of the R&D team - both leading and participating.

I also manage and oversee any outsourced development companies.
